

Safe to Learn: An Assessment of *School Climate* *and Discipline* in Florida

2017-2018

A red and white graphic of a school entrance sign. The sign is rectangular with a diagonal line running from the top-left to the bottom-right. The words "SCHOOL" and "ENTRANCE" are written in bold, capital letters on the sign. The background of the sign is white, and the text and diagonal line are red. The sign is set against a dark blue background with a pattern of red and white diagonal lines.

Safe to Learn: An Assessment of School Climate and Discipline in Florida

Florida's schools have been undergoing a troubling makeover in the aftermath of the tragic school shooting at Marjory Stoneman Douglas in Parkland. While these measures were pushed in the name of safety, few are supported by evidence. Conversely, there is evidence that some measures, like increased policing, may have a counterproductive effect, especially on our youth of color, youth with disabilities and LGB and gender-nonconforming youth.

For the first time in two decades,
school-related arrests are *rising*.

We are *losing* more youth to suicide
than *ever* before.

We want our kids to *be* safe. Not for adults to *feel* like our kids are safe.

Experience and research tells us what works: authoritative discipline. Such discipline pairs high expectations with high levels of support. The goal of discipline is to help students be better equipped to navigate future conflicts and make better choices. Examples of such discipline models or strategies include social-emotional learning,¹ conscious discipline,² restorative justice,³ and collaborative & proactive solutions.⁴

These strategies and models require commitment, time, and resources. It isn't enough to end corporal punishment, suspensions, expulsions, seclusion or restraints. Such outdated, and often cruel, practices must be replaced by evidence-based practices that are focused on keeping children out of the School-to-Prison pipeline and treating kids like kids.

As Florida's schools implement recent legislation, the community must ensure that mistakes of the past are not repeated. The School-to-Prison Pipeline exists - kids are being pushed out of school through discipline and arrests and funneled into the justice system. Racial disparities plague every corner of the system and are compounded at every stage. Policymakers, school administrators, teachers and police officers must carefully weigh each decision along the way, as each step away from the school house will take a child closer to the jail house.

Use this report to gauge how your local systems, from the school to the courts, are serving youth in your community and use this tool to advocate for change. You can find more advocacy resources at <https://www.aclufl.org/en/keep-kids-learning-institute>.

The State of Florida's School-to-Prison Pipeline

After years of steady progress, Florida stands on the verge of turning back the clock on positive school climates and age-appropriate youth rehabilitation.

The Rise and Fall of Zero Tolerance

In the years after Columbine, the first high-profile mass shooting at a school, states expanded zero tolerance laws that had been intended to keep guns and drugs out of schools.⁵ Many feared the uprise of a generation of “Super Predators” and swift, harsh consequences were seen as necessary for safety.⁶

The Super Predators never arrived. Instead, violent crime fell even as schools referred students to the police for typical behavior, like school fights and class disruptions, even spit-balls, food fights and science experiments.⁷ In 2009, the Florida Legislature, following the advice of Blueprint Commission on Juvenile Justice,⁸ tried to insert some logic into school discipline policies by clarifying Florida's Zero Tolerance Law.⁹ In subsequent years, more reforms, such as civil citations and other pre-arrest diversion programs, gained traction and mitigated some of the harms that originated from the increased policing of youth.

The shift toward a smart approach to juvenile delinquency attributed to a plummeting youth arrest rate in Florida - from 77 per 1,000 youth in 2006-07 to 31 per 1,000 in 2016-17.¹⁰ This mirrored falls in crime rates across the country. The drop in Florida's school arrests was more gradual, but consistent - the share of youth arrests occurring at schools declined from 22% in 2006 to 18% in 2016-17.

Florida Legislature Breathes New Life into Bad Ideas

In the aftermath of the tragic mass shooting at Marjory Stoneman Douglas High School on Valentine's Day, 2018, students witnessed an influx of law enforcement into their schools. Legislation was passed to require at least one police officer or armed staff at every K-12 school in the state. Zero tolerance laws and policies were expanded. Students became suspects.

"...the state has moved swiftly to create an unprecedented school climate focused on armed security, at the risk of our kids' healthy development."

Despite the Marjory Stoneman Douglas Public Safety Commission (MSD Commission) finding only 46 planned attacks at schools nationwide over the last two decades, with 21 resulting in deaths, it recommended massive increases in security in schools.¹¹ From police integrated into school administration to armed staff and teachers, the state has moved swiftly to create an unprecedented school climate focused on armed security, at the risk of our kids' healthy development.

As fear swirled and policies were changed to increase school policing, students saw the consequences. During the 2017-18 school year, compared to the 2016-17 school year:

- The number of students with no prior delinquency record who were either arrested or cited by police for disorderly conduct at school increased by 18%.
- Police wrote 23% more citations and made 2% more misdemeanor arrests in schools.
- The percentage of youth arrests for misdemeanors that occurred at schools, rather than in the community, increased to 20%, the first increase in a decade.
- The number of civil citation eligible offenses (petty misdemeanors committed by youth with no criminal history) increased by 23%, the first increase since the program's creation.

Available data suggests this increase in school policing will continue in the 2018-19 school year. Conversely, community youth arrests continue to fall. Overall, police made 12% fewer youth arrests in the community in the 2017-18 year.

Unsupported Schools

Similar to the trends in youth policing, exclusionary discipline has been declining. Exclusionary discipline includes punishments like suspensions and expulsions that remove students from the classroom for an extended period of time. Recognizing evidence that such exclusionary discipline does not change the problem behavior and increases the risk of future arrests while decreasing the rate of graduation,¹² school districts worked to decrease exclusionary discipline rates from 186 students per 1,000 in 2007-08 to 117 students per 1,000 in 2017-18.¹³

Unfortunately, during the same time, school funding stagnated, rising only 3% between the 2007-08 and 2017-18 school years - a 12% reduction considering inflation. Kids need discipline - they need to be guided and taught how to appropriately navigate conflict. It isn't enough not to send kids home, we have to invest in their social-emotional development.

Today's teens are far less violent and commit far fewer crimes than their parents and grandparents' generations. Instead, they struggle with anxiety and depression at unprecedented rates - apart from accidents, suicide is the most common cause of death for teenagers. The suicide rate for 10 to 17 year olds is higher than it has been in at least 20 years. Annually, we lose nearly 4 youth out of every 1,000 in Florida to suicide.¹⁴

Our students don't need police, they need support. Yet, no school district in Florida meets the recommended ratios for school-based mental health service providers, like counselors and social workers.¹⁵ There are more police officers in Florida schools than school nurses.

Recent legislation provides more direction for local school boards to invest in student support, but few resources to achieve this. The Mental Health Assistance Allocation from the state to local school districts increased by 8% to a total of \$75 million, or \$26.47 per student. By contrast, the Safe Schools Allocation, which funds school police and school security provisions, was increased 11% to \$180 million, or \$63.53 per student, not including the \$500,000 available to train and arm school guardians or the \$50 million available for building security.¹⁶

Students Pay the Price of Policing

School police introduce significant civil rights concerns. While school administrators enjoy greater access to and control of the students in their care, youth generally have the same rights against unreasonable searches and seizures by police as adults. Police working in schools blur this line and policymakers are further muddying these waters - granting police greater access to student records and allowing them a greater role in student discipline.

School Police:

- ✗ **No required training to work in schools**
- ✗ **No minimum age or restriction for the use of pepper spray**
- ✗ **No minimum age or restriction for the use of Tasers**
- ✗ **No minimum age for arrests**

Sadly, while the justification to bring police into schools lies in stopping an attack, there is little evidence to support that school police can do this. Instead, the MSD Commission found that the fact that the school's police officer had been a decorated school resource officer likely contributed to his failure to act to protect students that fateful day - he was not accustomed to the sorts of high-stress, high-risk situations that police officers working outside of schools are.¹⁷ Subsequent litigation affirmed that police officers have no duty to protect students from an active shooter.¹⁸

Police officers who are focused on disciplining students and maintaining classroom order cannot be prepared to react in a rare, dangerous event like a mass shooting. And police are not trained in child and adolescent behavior, classroom management, social-emotional learning. Like any well-meaning adult, officers can mentor, but they cannot be a counselor. If they are in schools, their role must fit their training and be focused on protecting students, not serving as disciplinarian.

The Path *Forward*

For all these reasons, we call on state and local policymakers to ensure our youth are:

- **Treated Fairly** - Revise policies on student discipline, school policing, pre-arrest diversion and transfers to the adult system to promote age-appropriate practices and uniformity.
- **Respected** -
 - ✓ Increase administrator and teacher diversity.
 - ✓ Require implicit bias training for all staff and any security or police interacting with students.
- **Supported** -
 - ✓ Invest in school-based mental health providers, like school counselors, social workers and psychiatrists, and use their expertise when making policy.
 - ✓ Train teachers, including substitute teachers, and staff on de-escalation tactics, trauma-informed care, and positive discipline.
- **Disciplined, Not Punished** -
 - ✓ Invest in social-emotional learning and conflict resolution that teach students, not exclude them.
 - ✓ Ban the use of exclusionary discipline and arrests for young students.
 - ✓ End the arrest of students for disorderly conduct and disruption of a school function.
 - ✓ Invest in community rehabilitation programming and services for at-risk youth.
- **Protected** -
 - ✓ Ban the use of Tasers, pepper spray and other violent policing tactics on juveniles.
 - ✓ If school police are used, ensure their role is clearly defined to protect the students and not to police student behavior.
 - ✓ End the practice of charging youth as adults without the input of a judge or grand jury.

Florida's School to Prison Pipeline

2017-2018

KIDS PUSHED OUT OF SCHOOLS:

258,585

Florida students attend schools with armed guards or police, but *no* counselors.

117/1000

For every 1,000 students, Florida schools order 117 *suspensions* and *expulsions*.

↑RISK

Suspensions and expulsions *increases the risk* a youth will drop out of school and *increases the risk* they will be arrested.

66%

Percent of Florida's prisoners who *do not have* a high school education.

KIDS CAPTURED BY THE CRIMINAL JUSTICE SYSTEM:

7,405

Arrests made in Florida schools, with an additional 4,652 *citations* issued by police.

38%

Of student arrests are for *simple fights* or *disorderly conduct*.

1 ARREST

A single arrest *increases the risk* a youth will be arrested again and *reduces the likelihood* of graduating high school.

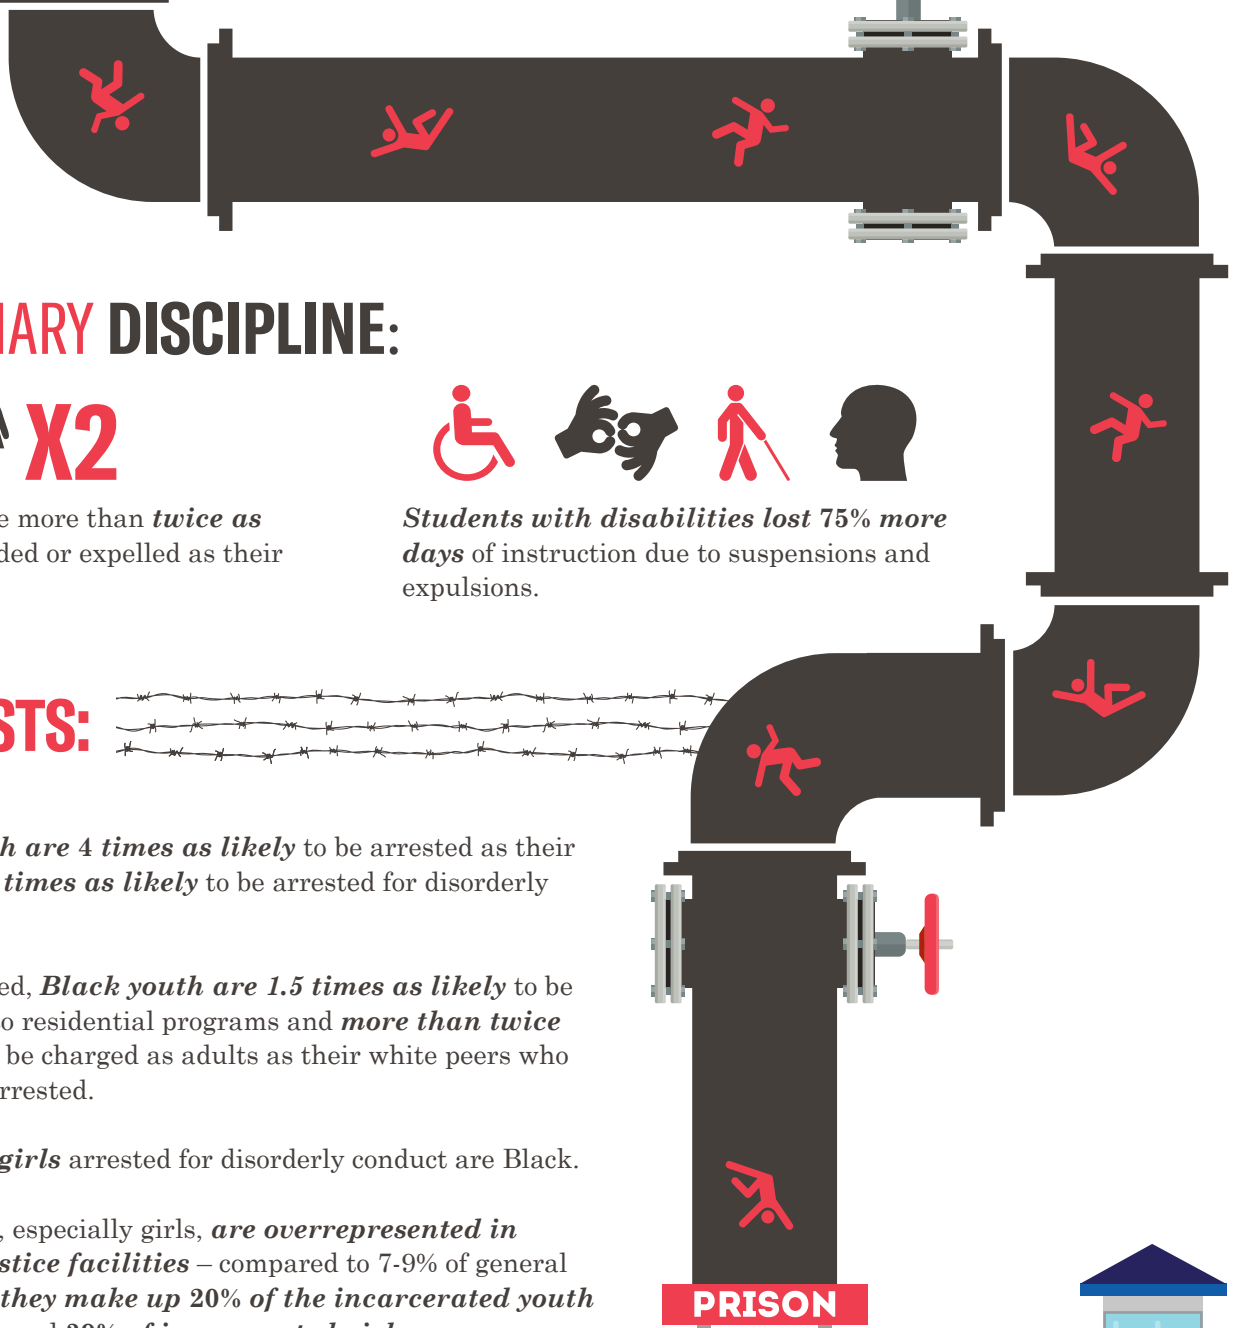

25%

A quarter of youth arrests each year are for violating agreements, like *probation, aftercare* and *non-prosecution agreements*.

Florida's School to Prison Pipeline

2017-2018

EXCLUSIONARY DISCIPLINE:

Black students are more than *twice as likely* to be suspended or expelled as their peers.

Students with disabilities lost *75% more days* of instruction due to suspensions and expulsions.

ARRESTS:

Black youth are *4 times as likely* to be arrested as their peers and *7 times as likely* to be arrested for disorderly conduct.

Once arrested, **Black youth** are *1.5 times as likely* to be committed to residential programs and *more than twice as likely* to be charged as adults as their white peers who have been arrested.

70% of the girls arrested for disorderly conduct are Black.

LGB youth, especially girls, *are overrepresented in juvenile justice facilities* – compared to 7-9% of general population, *they make up 20% of the incarcerated youth population* and *39% of incarcerated girls*.
